

MCI For Metal & Plastic Caps Industry

MCI For Metal & Plastic Caps Industry

*The largest company in the Middle East and Africa
Pilfer-proof | Flip-Off | Aluminum sales caps*

About Us:

The largest one of manufacture for closer caps in the Middle East and Africa. Established in early 1998. The company's first plant was opened in 2014. We have the latest international production lines. Our production capacity more than 416 million caps yearly. We are working for developing our products to meet the highest technical standards, conforming to the highest international quality standards, especially with the requirements of GMP and FDA.

Process of production:

To produce according to international standards of P.P Caps. We interested in control production from first moment entrance the raw-materials till finish using in place of our clients.

First step:
To produce according to international standards of P.P Caps. process, allocated for the use of medication and food, and then required to face paint aluminum sheet.

Second step:
After finish cutting operations and printing, is moving to production workshop to start produce the caps by four phases.

Phase I:
The formation of the caps by pressure way, and to ensure that the size of the cap within the global sizes and not less of them.

Phase II:
The Caps is moved to civility process, it's by a second machine, to make sure of the size and the completion of the dimensions according to the requirements of our client.

Phase III & IV:
The Caps is transferred to a knurling machine, through this process its forming the body of cap (drawing body, external teeth, forming a cutter and bridges), and then transferred again to the Liner machine, for put the internal Stoppers (EPE-Liner), and then move directly into bags and hard boxes.
